

SOFT EDGE

INTELLIGENT SOLUTIONS FOR DAMAGE CAPTURING

Vitalii Istushkin
Business Development Executive
Co-Founder

WWW.SOFT-EDGE.COM

The Problem

More than half of car damage inspections measurements in Europe are done manually and on the paper.

Hail damage inspection can take more than 1h and additional time needed to digitize results.

HailMaster Mobile app

Solution for quick and precise automatic hail damage detection and precise measuring damage area using AI on mobile device.

- ★ Digitalization of the all data in damage capturing process
- ★ Brings transparency to hail damage assessment process
- ★ Saves lot of time
- ★ Basic functionality available for Free in AppStore
- ★ Unlimited functionality for professionals with additional PRO functions available on subscription base

HailMaster Webservice

Integratable solution for quick and precise automatic hail damage detection and precise measuring damage area using AI.

- ★ Easily integratable solution in to existing business process or mobile applications.
- ★ Brings transparency in hail damage assessment process
- ★ Model can be improved on regular basis
- ★ Webservice can be hosted in the cloud and also on the client side.

Market

EUROPE it's only beginning with more than 334m vehicles on Europe's roads, 1026 Motor Insurance Companies

635 000 Hail & Storm insurance claims at 2013 in Germany

In 2018 alone, people in the US witnessed 4,611 major hail storms of damaging proportions.

Between 1996 and 2016, hail storms caused damage estimated at around \$29.7 billion in insurance losses.

The largest hailstone according to data was recorded to have fallen in Vivian, South Dakota.

Insurance companies paid \$5.37 billion in claims for hail damage between 2008–2014.

Wind and hail deductibles are becoming an omnipresent part of insurance policies.
